

Equipment Lifecycle Solutions

At Proserv, we specialise in asset new build and lifecycle solutions. Our integrated service capability allows us to truly partner with clients providing tangible value to their projects and the way they operate.

Our Business Model

The breadth and depth of our service range is unrivalled in the industry. Our competency and level of expertise combined with our facility capacity & capability, allows us to become an extension of our clients' business; we take away all the burden and inefficiencies of trying to manage multiple partners and provide a single-sourced solution for developing, maintaining and optimising the performance of client assets.

Capacity & Capability

The Proserv Difference

'Ingenious Simplicity' is not just our company tag-line, it is an ethos embedded into everything we do and stand for; from the way we approach our design & engineering right through to how we implement our work processes and support the delivery of projects.

From our clients' viewpoint, it is about being more flexible and responsive to their needs and reducing unnecessary levels of complexity in order to get the job done.
