

Proserv has an extensive history spanning nearly 60 years

Proserv has evolved significantly over the years, both through organic growth and strategic acquisition, in order to develop our controls expertise. Recent partnerships have further strengthened our move into intelligence solutions and renewables.

For over 60 years, our teams around the world have been at the forefront of new technology advancements, delivering innovative controls technologies to our customers throughout an asset's life, improving reliability, maximising production and reducing downtime.

Through organic growth and the acquisition of like-minded companies with shared strengths and complementary technologies, Proserv owns the best known brands in the industry – Brisco, eProduction Solutions, Autocon and CAC, which has strengthened our overall capabilities and expertise.

Brisco provides topside and subsea wellhead controls.

eProduction Solutions and **Autocon** supply manufactured production control products.

CAC designs, installs and services electronic automation, pneumatic and hydraulic systems for the oil and gas industry worldwide.
